

Bishop Weekly Update – 9/23/2020

Hello, Bishop Community ~

You might have noticed a news outlet presence on and near the Bishop campus yesterday afternoon and now, again this morning. This is in response to a child who was sent home yesterday in response to our district health and safety protocol. I have included a statement from Dr. Bodie for your reference.

Statement from Dr. Bodie ~

A student at Bishop Elementary School was sent home early today after he displayed COVID-19 related symptoms. This decision was made both out of an abundance of caution and in accordance with district protocols related to COVID-19. This isolated incident is not indicative of any need for wider concern of COVID-19 exposure. Per district protocols, the student will either have to produce a negative COVID-19 test, written documentation from a health care provider stating it is an alternative illness or be symptom free for 10 days following the start of the symptoms.
